

Remarks

In the instant Supplemental Amendment, Applicant has remedied the inadvertent non-compliance with 37 CFR 1.121.

Applicant has begun each of the Specification Section and the Remarks Section on a separate sheet. Amendments to the "Related Applications" Section have been shown in the previous page by underlining the additional text. In particular, this new text states that application Ser. No. 09/354,691 is now U.S. Patent No. 6,669,864 and that application Ser. No. 08/693,287 is now abandoned.

Applicant has rectified the non-compliance of the instant amendment by providing a 1.121 supplement to the additions to the "Related Applications" Section of the specification. Accordingly, Applicant requests that the Examiner allow Claims 1 - 3.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Al Harrison', is written over a horizontal line.
